EDUCATION

- Wyższa Szkoła Ekonomii i Innowacji w Lublin; Logistics (2017-2024);
- Chervonohrad Mining and Economics College; Software Engineering (2024-present);

PROFILE

Hi, I've been studying programming for over a year and now I'm actively practicing website and application development. In my portfolio, which can be found at the link below, I have collected several projects where I demonstrate my skill level and experience. I also have a commercial background in website development, which has given me the opportunity to get experience with customer engagement and teamwork.

EXPERIENCE

MY PORTFOLIO

Check out my latest projects, which describe the technologies used, as well as other tools I've worked with. Each project has a link to a GitHub repository where you can view the code and structure of the projects.

COMERCIAL PROJECTS

FREELANCE | 2024 - PRESENT

During the projects, I created HTML markup and styles using CSS (SCSS) based on the design in Figma. I also implemented animations using JavaScript and SCSS, and validated forms using JavaScript. I used jQuery plugins such as Swiper for interactive elements of the site. My work included testing, finding and fixing bugs. I collaborated with the team via GitHub and regularly engaged with the client to clarify project details.
